Subject: **registration is currently not possible**

October 4, 2023

Dear reader,

In recent years, the number of patients registered with us have grown considerably. Due to limited space, we are now reaching limits. To guarantee the quality of care no new patients are accepted **until March 29, 2024**, except for:

1. New-borns.
2. People who are going to live together, and of which the partner is already registered with us.
3. People who have previously been registered with us.

These people can pick up a registration form from the doctor's assistant at the practice counter. In this case, please bring a valid ID with you, so that registration can be completed immediately after completing the form.

Kind regards,

DoktersTeam.
